

Blue Sky

When you come to fly next time the trailer and main hangar will be quiet... but our planes are still ready to fly! The City of Morris decided to build a larger parking lot this spring to fit their long-term airport plan in the space occupied by the Blue Sky trailer and main hangar, so we moved out at the end of December. ***THANK YOU to all that helped!! We could not have done it without you!!!*** No worries though, as Blue Sky intends to keep on flying at Morris as other training operators have successfully been doing with no "brick and mortar" facility. We look forward to making more tailwheel pilots, Stearman lovers and providing transition experience in the RV8 and you will have access to the Pitts acro and RV4 training!

We also love helping pilots find and buy and fly their dreams home too by not only helping with the paperwork process but also getting the plane to its new home. Any questions please call me 815-252-1031 or email cindy@blueskyaero.com

Blue Sky News

James Horsley learned to fly at **Blue Sky** in 2012, and last October he took his first flight in N7297Q with this wife and son! I believe this is the face of a future pilot!! Member **Dave Butler** took the Citabria out with his daughter on one of the coldest days of the year! He told me how beautiful it looked, "like something out of a movie" and enjoyed seeing the cloud of snow when turning on the grass strip. Go Dave! Only few other pilots braved the cold; **Michael Jagmin, Brian DePung, and Scott Kaluf. Randy McMahel** gave his wife **Marie** and their daughter their first flights in the RV8!! Soon Blue Sky will be able to offer the RV8 for transition training!!

My Favorite Weather Site is BACK!!! Navmonster used to be my go-to for internet weather info until one day a few years ago I clicked as usual on their site to find a sad note that they had been targeted in a lawsuit by some large chart corporations to stop or pay up! Years go by... and Jana Trofimchuck mentioned they are back!!! All you have to do is put your departure and destination airport in and Navmonster does the rest... all on one easy page. Easy path ... www.navmonster.com Works on Apple and Android too! **Give it a try ☺**

More new Pilots! Some of you may remember CFI **Jerry Gebus** that taught for BSA in 2005. He is now an airline pilot, lives in Florida and just bought a Cherokee to teach his three boys how to fly. They have a head start as he has already exposed them to glider flying! Thanks for sharing Jerry and have fun!
